Train-Car Crash Claims Life

Mrs. Jeanetta Miear Hartless of Evington, Va. was killed Monday and the driver of the car in which she was riding was injured when a Norfolk and Western freight crashed into Ronald Lee Varner's automobile at the Route 47 crossing at Pamplin about 1:35 p.m. The N & W train was traveling east. State Police trooper G. H.Gregory, who investigated the accident, said that Varner apparently did not realize the train was coming or failed to notice the warnings, a flashing light and sounding bells. The engineer of the train, Richard James Norcross of Roanoke, said he approached the crossing with his headlamp on in addition to blowing the engine's whistle. After being struck the car was hurled 45 feet before hitting a railroad power line. Both the driver and dead woman were thrown out of the car. Appomattox County Rescue Squad took the injured man to Lynchburg General Hospital. Prince Edward County Rescue Squad also answered the call.

LAND ASSESSMENTS UP

Cont'd from Page 1

Assessed value of lots in Pamplin in 1971 was $34,800 and now stands at $45,650 with 1971 valuation of buildings and improvements standing at $146,360 as compared with the 1972 valuation of $181,330 for a total of $224,980. Total 1971 levies on a total evaluation of $181,160 were $5,434.80 with 1972 levies expected to be approximately $6,500.

The town of Appomattox saw an increase in land evaluation from $314,490 in 1971 to $581,070 in 1972. Assessed value of buildings and improvements increased from $1,608,810 in 1971 to $1,939,645 in 1972. The 1972 total is $2,520,715 as compared with the 1971 total of $1,923,300. Levies for the town in 1971 totaled $57,699 with 1972 levies expected to be approximately $73,000.

Individuals who want to check on assessed values of their property may do so at the Clerk's office in the Court House complex, where individual land and building assessments are listed.

Notices of taxes on land and buildings are mailed each October from the county treasurer's office.

The county budget is prepared with these tax receipts in mind, plus revenues from taxes paid by public utilities, state and federal assistance grants, local 1% sales tax, sales tax revenues returned for school operation, and state and federal funds for school operation.

Total real estate taxes in 1971 were $295,370.97. This year's total from the same source should be about $442,631.17.

HERNCALL ELECTED PRESIDENT OF FARMVILLE JAYCEES

sary in March of this year.

Herncall is a graduate of Appomattox High School. He attended Duke University in 1966 and 1967 and earned a degree in business management of Lynchburg College in 1970. He was employed in the circulation department of the Lynchburg News while in college and during a year of employment there following college, attained the post of city city circulation manager.

A member of the Farmville Lions Club and Wedgewood Country Club. Herncall is married to the former Bonnie Jean distributed among the 50 states during the past year. This compares with $23.5 billion in 1970.

Much more than this is available to states and localities, it is noted. Various funds that are obtainable go begging because no application is made for them.

The reason is, according to Senator William V. Roth of Delaware, who made a study of the situation, that there are no less than 1,350 aid programs on the books, administered by 57 departments and agencies of government. No comprehensive listing of them has ever been made.

The Pastor Speaks

"The Day Of Salvation"

Cor. 6:2

There is a story told in ancient history of a certain King who lighted a lamp and had it hung in his palace; he then sent Heriles forth to bring every criminal and rebel to his presence that they might obtain pardon. Those who came while the lamp was burning were set free. But those who delayed till the lamp had gone out, who altogether neglected the invitation, met a terrible death.

There is also the story of a queen and an artist. The artist solicited permission to paint a portrait of the queen. The favor was granted and the favour was great, for it would make a fortune of the m- At the fixed place and time the queen appeared but the artist was not there. He was not ready yet. When he did arrive a message was given to him that the queen had departed and would not return. Such is the story, the King Eternal, our Lord Jesus Christ, consented to meet man. He fixed in his covenant and promised in his word, the place and time of the meeting; it is for salvation; it is in Christ, and it is now. He has been true to his appointment but oh how often it is otherwise with man.

My dear reader, is this true in your life? Has God made the provision and you through carelessness or rebellion refuse to meet him on his terms? The consequence you must bear! Look to Jesus today while today there is salvation.

Producers Benefit By Early Certification

Producers have to certify their compliance under the 1972 set - aside farm programs. Deadline for certification in Appomattox County is June 30, according to J. P. Alvis, Jr., Chairman of the County Agricultural Stabilization and Conservation (ASC) Committee.

In most cases, it will be to a producer's advantage to certify his program acres as early as possible, he said. However, he emphasized that early certification is optional, and that a producer may certify at any time through June 30.

A producer must complete his certification before he can receive any set-aside payment.

To certify, a producer signs a statement at the County ASCS Office showing the acreages devoted to various crops under the 1972 farm programs. At the same time, he designates the amount and location of his set-aside acres.

"The Appomattox County ASCS Office is ready to give farmers all possible help in correctly certifying their acres," Mr. Alvis said. ASCS personnel will be glad to answer any questions or help with problems."

Producers who certify in time for data to be processed will get checks for their preliminary set aside program payments as soon after July 1 as possible.

The County ASCS Office also provides measurement service, at cost, to help producers determine acreages at planting or at certification time.
